snmpd EMS . .

/

snmpd .

	service snmpd status	Active: active (running) Active: inactive (dead)
	service snmpd stop	Active: inactive (dead)
	service snmpd start	Active: active (running)

	service snmpd restart	Active: active (running)

snmpd **/etc/snmp/snmpd.conf.**

/etc/snmp/snmpd.conf

```
#       sec.name  source          community
#com2sec paranoid  default         public
com2sec readonly  default         public
com2sec readwrite default         private
# readwrite ON for Keepalived SNMP SET support

####
# Second, map the security names into group names:

#                     sec.model  sec.name
group MyROSystem v1        paranoid
group MyROSystem v2c       paranoid
group MyROSystem usm       paranoid
group MyROGroup v1         readonly
group MyROGroup v2c        readonly
group MyROGroup usm        readonly
group MyRWGroup v1         readwrite
group MyRWGroup v2c        readwrite
group MyRWGroup usm        readwrite

####
# Third, create a view for us to let the groups have rights to:

#           incl/excl subtree                          mask
view all    included  .1                               80
view system included  .1.3.6.1.2.1.1
#view system included  .iso.org.dod.internet.mgmt.mib-2.system

####
# Finally, grant the 2 groups access to the 1 view with different
# write permissions:

#               context sec.model sec.level match  read   write  notif
access MyROSystem ""      any       noauth    exact  system none   none
access MyROGroup ""       any       noauth    exact  all    none   none
access MyRWGroup ""       any       noauth    exact  all    all    none

# -----------------------------------------------------------------------------

syslocation Unknown (configure /etc/snmp/snmpd.conf)
syscontact Root <root@localhost> (configure /etc/snmp/snmpd.conf)

# For Keepalived SNMP support
master agentx
```
