

# v1.20\_Keepalived

- `keepalived`
  - `keepalived`
  - `keepalived`
    - `-`
    - `replicaSet MongoDB.`
- `/ keepalived`

## keepalived

keepalived open source , (high availability) (load-balancing). VRRP, Linux Vitrual Server (IPVS). Keepalived Eltex , . Keepalived SoftWLC, VRRP.

### keepalived

( root):

```
root@master:/# apt update
root@master:/# apt install keepalived
```

Keepalived :

```
root@master:/# systemctl enable keepalived
root@master:/# systemctl start keepalived
```

### keepalived

keepalived :

<code>/etc/keepalived/keepalived.conf</code>	
<code>/etc/keepalived/check_ping.sh</code>	EMS
<code>/etc/keepalived/keep_notify.sh</code>	, ( MASTER, BACKUP, FAULT)
<code>/etc/keepalived/mongo_switch.js</code>	replicaSet MongoDB , VRRP

## /etc/keepalived/keepalived.conf

```
! Configuration File for keepalived
