

ONT NTU-MD500P

Subscriber terminal (ONT) NTU-MD500P

NTU-MD500P — optical network terminals which have 4 ports of 10/100/1000BASE-T with IEEE 802.3at PoE+ support. The NTU-MD500P terminals provide up to 30 W of power on 10/100/1000BASE-T ports having 65 W of power budget.

Use cases

- connecting users in apartment buildings, residential areas, student campuses and facilities to broadband services;
- corporate networks constructing for strategic industrial facilities and business centres with high safety and data rate requirements.

PoE support

Support for PoE technology allows NTU-MD500P to supply power via UTP cable to IP phones, wireless access points, IP cameras and other PoE-enabled devices.
