

Backup EMS/ACS crontab

backup EMS/ACS , EMS. crontab.

crontab root:

```
sudo crontab -e
```

, :

```
# Edit this file to introduce tasks to be run by cron.
#
# Each task to run has to be defined through a single line
# indicating with different fields when the task will be run
# and what command to run for the task
#
# To define the time you can provide concrete values for
# minute (m), hour (h), day of month (dom), month (mon),
# and day of week (dow) or use '*' in these fields (for 'any').#
# Notice that tasks will be started based on the cron's system
# daemon's notion of time and timezones.
#
# Output of the crontab jobs (including errors) is sent through
# email to the user the crontab file belongs to (unless redirected).
#
# For example, you can run a backup of all your user accounts
# at 5 a.m every week with:
# 0 5 * * 1 tar -zcf /var/backups/home.tgz /home/
#
# For more information see the manual pages of crontab(5) and cron(8)
#
# m h dom mon dow    command
```

:

```
@weekly /var/ems-backup/main-dump-rotate.sh 127.0.0.1 3306 javauser javapassword 14
```

@weekly - , , :

- **@reboot** - , ;
- **@yearly, @annually** - ;
- **@monthly** - ;
- **@daily, @midnight** - ;
- **@hourly** - .

/var/ems-backup/main-dump-rotate.sh -

127.0.0.1 - host mysql javauser, 127.0.0.1

3306 - mysql, 3306

javauser - mysql EMS/ACS

javapassword - mysql

14 -
