Enterprise Wi-Fi Access Points

This group includes equipment designed for organisation of Wi-Fi zones in a radius of 100 – 150 m. Furthermore, ordinary customer devices are connected to the access points: smartphones, tablets, laptops. Typical projects in this area include organization of Hotspot in public places or organization of a secure Wi-Fi network for employees in a client's office.

The line of Enterprise Wi-Fi access points produced by Eltex Enterprise is represented by models:
