

Version 2.5.0. VP series IP phones

VP series IP phones are perfectly suitable for companies with high requirements to the quality of voice data transmission, reliability and usability. The devices operate via SIP and support SIP Proxy redundancy which allows to always stay in touch. Automatic configuration (TR-069, DHCP) helps to manage large amount of devices from a single server. VP-12P and VP-15P use PoE technology for power supply.

IP phones VP-12 and VP-12P
