

WEP-1L

Solution for enterprises

WEP-1L provides accessible, easy-to-use, high-performance and secure wireless network that combines numerous features and services required by corporate clients. WEP-1L is a universal solution for organization of wireless networks with small amount of users (offices, small branches of organizations, etc.).

Wireless connection

Due to support for IEEE 802.11n/ac standards the WEP-1L access point provides 300 Mbps (at 2.4 GHz) and 867 Mbps (at 5 GHz) data rates. The use of MIMO technology and embedded omnidirectional antennas makes WEP-1L a universal solution for corporate networks construction.

Performance

High-performance processors are used in the devices in order to provide reliability and high data processing rates.

Security

WEP-1L provides personal data protection and corporate environment security due to the support for modern authentication technologies. Particularly, it uses a dynamic key that is unique for each active user station.
